

**Chaga International**  
Health ~ Longevity ~ Prosperity

## ***Healing the World - One Person at a Time***

***Dear Chaga:***

My name is Nancy Saporta. I have been through some rough times and in many different ways. A few I can share and others that relate to personal stress would make anyone think I would be writing a drama movie.

My brother Mike and I were both diagnosed with cancer in 2004 after we had buried my sister, Ann, who had died from cancer, next to my brother, Bill, who died from a sudden heart attack in 2000 at the age of 49. We could not keep our minds from wondering why. In 2006, Mike died and I felt so alone. My father had also died from cancer at the age of 49. My Mother, a cancer survivor, will be 84 this year. The stress of my family health history and concern for my own health has been overwhelming.

I was on chemo for blood cancer daily for 3 1/2 years. The damage to my body is extensive from my brain function to just simply eating different foods. Last year I was so sick I was on a walker and could not speak correctly. I don't remember things that happened, as well as many conversations with friends.

I have always been open to health products and never thought anything was really going to help me because it appeared to be a dooms day scenario for me. My husband is the assistant strength and conditioning coach for the Denver Broncos, a very good job, so we researched, bought every supplement, and tried them ***ALL***.

Maybe it was a mental attitude that I wanted to be healthy that I grabbed onto the hope. I knew there was something out there that could help me. Some things helped a little but it was not until I heard about Chaga that I felt I had found something really special.

Many people I know did not expect me to even be alive when I called Steve Gould to find out more about Chaga. I was amazed to learn about Chaga's history of helping others and the vision of the company. I began taking Chaga in December of last year, and in just 3 months I noticed a real difference. My friends that know how sick I was can see how much I have improved. My friend, Beverly, said we spoke last year when I was really sick and I have no memory of speaking to her and many others. Another friend, Lois, saw me in my previous condition and has seen my improvement and has embraced Chaga's mission to help others. I now feel better than I can remember and have energy.

I saw the oncologist in February 2008 for my blood work. It has been about 3 months since my last visit and my husband Greg and I were getting the message from the doctor to expect to be back on chemo. I was not looking forward to that. I received the blood results back and they are ***normal – no need for more chemo!***

***Thank you Chaga!*** Chaga is the only thing I have been doing different since December. Three months and our primary doctor and our oncologist both gave us good reports. I know it is not my mental attitude of "I hope I am better", it's two blood reports showing the facts!

I love that I believed there was a natural product that would help me and I found everything I ever dreamed about at Chaga International. One of the best things about Chaga is the people I am surrounded by who are dedicated to the Chaga mission.

***I feel I am back into a life and with a purpose.***

I want to give people hope and am not saying Chaga cured anything. But I can say giddy up to life with a smile on my face.

Thank you Chaga International ***for sharing hope and life.***

Sincerely,

***Nancy Saporta***
